### Notice Concerning the Execution of Agreement on the Transfer of Shares in Seitan Incorporated.

Hitachi Metals, Ltd. (hereinafter, “Hitachi Metals”) hereby announces that it has decided to conduct a transaction (hereinafter, “this transaction”) to transfer all shares held in Seitan Incorporated. (hereinafter, “Seitan”), one of its consolidated subsidiaries, to SNT CORPORATION (hereinafter, “SNT”), by executing a share transfer agreement effective November 14, 2016.

#### 1. Purpose of this transaction

The Hitachi Metals Group has focused on concentrating its resources in business fields in which both higher profitability and growth are expected under its Medium-term Management Plan ending in fiscal 2018. Waupaca Foundry, Inc. (USA), the world largest supplier of iron castings, has been included in the Group as a part of the high-grade functional components company to which Seitan belongs, to put into practice the global growth strategy of casting components for automobiles led by Waupaca Foundry.

Under these circumstances, Hitachi Metals decided that the optimum solution for Seitan, engaging in forging automobile components mainly in small- and medium-size lots, was to entrust its management to SNT, a manufacturer focusing on forged products, so that Seitan will be able to continue its progress and growth in the future.

#### 2. Schedule

This transaction will be executed as scheduled below:

Execution of the agreement: November 14, 2016  
Transfer of shares: January 11, 2017 (planned)

#### 3. Future outlook

Following the execution of this transaction, Seitan will be excluded from the scope of consolidation of Hitachi Metals effective January 11, 2017. Since the impact of this transaction on the operating results of Hitachi Metals is negligible, there will be no change in the full-year forecasts for the consolidated fiscal year ending March 31, 2017.

4. Outline of subsidiary subject to transfer

(1)	Company name	Seitan Incorporated.
(2)	Head office	684-1, Futsukamachi, Minami-Uonuma City, Niigata Prefecture
