1. Operating Results and Financial Condition

(1) Analysis of Operating Results

1) Overview of Fiscal 2015 (fiscal year ended March 31, 2016)

While the global economy during the fiscal year ended March 31, 2016, remained on a modest growth track primarily in advanced countries, the slowdown in emerging economies that began last summer fueled uncertainty over future economic prospects. The U.S. economy continued to experience upturns supported by consumer spending, and the European market continued its slow recovery as a whole. Economies in emerging countries and resource-driven countries continued to grow at a slow pace as a result of the Chinese economy showing more signs of an accelerated slowdown and a drop in resource prices. Amid such situations, the Japanese economy remained in a holding pattern due to factors such as the impact of the slowdown in emerging economies on exports and production.

Among the industries in which Hitachi Metals Group (the "Group") operates, the automobile industry experienced strong demand in the United States; however, the domestic market saw continued inventory adjustments of small cars and demand was weak in China and some emerging countries. Steel production was on a declining path due to the effects of the worsened balance of supply and demand in Asia accompanied by the inventory adjustments. Further, public investment fell, while the Japanese housing construction market remained unchanged. The demand in the electronics industry fell due to weaker sales of personal computers and air-conditioning units.

Under these business circumstances as described above, the conversion of Waupaca Foundry, Inc. into a consolidated wholly owned subsidiary as of November 10, 2014, contributed to the financial results of the Group for the fiscal year ended March 31, 2016. When compared with those for the fiscal year ended March 31, 2015, revenues of the Group increased by 1.3% to ¥1,017,584 million and operating income increased by ¥15,547 million to ¥99,954 million. Operating income increased mainly due to posting gains on business reorganization and others of ¥30,232 million in other income arising from a transfer of shares equivalent to 51% of the issued shares of Hitachi Tool Engineering, Ltd. (currently named Mitsubishi Hitachi Tool Engineering, Ltd.) to Mitsubishi Materials Corporation as of April 1, 2015, despite a decrease in gross profit. For the fiscal year ended March 31, 2016, income before income taxes increased by ¥9,842 million to ¥96,233 million and net income attributable to owners of the parent company decreased by ¥1,513 million to ¥69,056 million, compared with the year ended March 31, 2015.

Results by business segment are as follows. Note that sales for each segment include intersegment sales and transfers.

High-Grade Metal Products and Materials

Revenues in the High-Grade Metal Products and Materials segment for the fiscal year ended March 31, 2016, were ¥241,987 million, a decrease of 7.2% as compared with those for the fiscal year ended March 31, 2015. Operating income of the segment increased by ¥18,682 million to ¥53,343 million for the same period, partly due to gains on business reorganization and others of ¥25,931 million arising from the transfer of shares in Hitachi Tool Engineering, Ltd. (currently named Mitsubishi Hitachi Tool Engineering, Ltd.) on April 1, 2015.

<Special Steels>

Despite the effect of economic slowdown on sales of tool steels in Asia, overall sales remained at the same level as compared with those for the fiscal year ended March 31, 2015, due to robust demand for automotive mold materials in Japan as well as a further shift towards high-value-added products in product lines. For industrial equipment materials, despite the expanded sales of environmentally friendly products and steady demand for other industrial components for overseas markets, sales fell compared to those for the fiscal year ended March 31, 2015, due to a continued partial production adjustment for automobile-related materials. Sales of aircraft-related and energy-related materials considerably increased because of continuing robust demand, as well as reflecting the performance of Hitachi Metals MMC Superalloy, Ltd., which became a consolidated subsidiary of the Group from the second quarter of the fiscal year ended March 31, 2015. Sales of alloys for electronic products, both display-related materials and semiconductors and other package materials, decreased as compared to those for the fiscal year ended March 31, 2015.

<Rolls>

Sales of rolls showed an increase due to growth in exports during the fiscal year ended March 31, 2016. Despite a decrease in demand for mobile devices, sales of injection molding machine parts remained steady year-on-year, thanks to robust demand mainly for large machinery.

<Amorphous Materials>

Sales of amorphous metals decreased as compared with those for the fiscal year ended March 31, 2015, due to a drop in demand for China, the major market for the products.

Magnetic Materials and Applications

Revenues in the Magnetic Materials and Applications segment for the fiscal year ended March 31, 2016, were ¥119,944 million, a decrease of 11.5% as compared with those for the fiscal year ended March 31, 2015. Operating income of the segment decreased by ¥1,918 million to ¥9,574 million for the same period.

<Magnets>

Sales of rare earth magnets decreased as compared with those for the fiscal year ended March 31, 2015, because of the slowdown in demand for industrial equipment and household appliances, despite strong demand in automotive electronic components for electric power steering and hybrid automobiles. Sales of ferrite magnets increased due to solid demand for automotive electronic components and household appliance parts, both in Japanese and overseas markets.

<Soft Magnetic Materials and Applied Products>

Sales of ferrite applied products experienced a decline in demand for solar power generation systems parts. Sales of ferrite core were weak, affected by a slowdown in demand in the Chinese market. Sales of FINEMET[®] diminished due to a decrease in demand for automotive electronic components and the production adjustment of air-conditioners.

High-Grade Functional Components and Equipment

Revenues in the High-Grade Functional Components and Equipment segment for the fiscal year ended March, 2016, were ¥365,118 million, an increase of 29.3% as compared with those for the fiscal year ended March 31, 2015. Operating income of the segment decreased by ¥2,595 million to ¥25,479 million year-on-year due to the Group posting gain on reorganization of ¥9,684 million following the transfer of all shares of Hitachi Metals Techno, Ltd. (currently, named SENQCIA Corporation) in the fiscal year ended March 31, 2015.

<Casting Components for Automobiles>

Sales of casting components for automobiles increased significantly as a whole compared with those for the fiscal year ended March 31, 2015, reflecting the incorporation of the performance of Waupaca Foundry, Inc., which became a consolidated wholly owned subsidiary from November 2014. Sales of heat-resistant exhaust casting components increased as compared with those for the fiscal year ended March 31, 2015, due to an increase in demand in both Europe and North America beginning from the second half of the fiscal year ending March 31, 2016, despite a temporary decline in demand during the first half of the fiscal year. Sales of aluminum wheels increased as compared with those for the fiscal year ended March 31, 2015, supported by robust demand in the United States.

<Piping Components>

Sales of casting iron fittings remained flat as a whole year-on-year in both the Japanese and overseas markets. Despite strong demand for gas piping components, sales of stainless steel and plastic piping components remained flat as a whole year-on-year due to a decline in housing starts.

Wires, Cables, and Related Products

Revenues in the Wires, Cables, and Related Products segment for the fiscal year ended March 31, 2016, were ¥288,246 million, a decrease of 12.1% as compared with those for the fiscal year ended March 31, 2015. Operating income of the segment decreased by ¥2,163 million to ¥17,682 million for the same period.

<Electric Wires and Cables>

While revenues from electric wires and cables decreased due to review of the Group's business portfolio, sales of electric wires and cables grew significantly, backed by steady demand for wires and cables for rolling stock, which is one of the focused areas of the Group, especially in overseas markets, and an increase in sales of probe cables for medical use.

<Automotive Products>

Sales of automotive products increased as compared with those for the fiscal year ended March 31, 2015, since both electronic components and brake hoses showed a steady increase, supported by continuing brisk demand for automobiles, especially in North America.

<Information System Devices and Materials>

Sales of information system devices and materials decreased as compared with those for the fiscal year ended March 31, 2015, as a result of weak demand in network products and wireless systems, due to prolonged sluggish capital investments in infrastructure by telecommunications carriers.

Other

Revenues in the Other segment for the fiscal year ended March 31, 2016, were ¥3,547 million, a decrease of 18.6% as compared with those for the fiscal year ended March 31, 2015. Operating income of the segment decreased by ¥63 million to an operating loss of ¥143 million for the same period.

2) Outlook for Fiscal 2016 (the fiscal year ending March 31, 2017)

As for the Group's business environment, although the Group expects the U.S. and European economies to continue on a recovery path, caution is required going forward, as there are many uncertainties stemming from concerns about further economic slowdown in emerging countries, such as China and resource-rich countries, sudden fluctuations in exchange rates, and declines in the price of crude oil and other resources.

In this business environment, the Group is preparing a fiscal 2018 medium-term management plan (ending March 31, 2019) to position itself as a top-class global manufacturer of highly functional materials. The plan will be released in May 2016. The consolidated operating forecasts for the fiscal year ending March 31, 2017, the first year of this medium-term management plan, are as follows:

Consolidated operating forecasts for the fiscal year ending March 31, 2017 (April 1, 2016 – March 31, 2017)

(% represents the percentage change year-on-year)

	Net sales		Operating income		Income before income taxes		Net income attributable to shareholders of the parent company		Basic earning per share

(Note) Beginning from the fiscal year ending March 31, 2017, in order to give a true view of the condition of the Company's business without the effects of business restructuring, adjusted operating income is presented as "operating income" in the table above, wherein said adjusted operating income is the operating income recorded in the consolidated statement of income, excluding non-operating income and expenses, and extraordinary income and

losses. Adjusted operating income is a unified profit indicator for the Hitachi Group, including Hitachi, Ltd. Adjusted operating income for the fiscal year ending March 31, 2016, was ¥76,061 million.

(2) Analysis of Financial Condition

1) Assets, liabilities, and equity

The analysis of changes in the Group's consolidated statement of financial position as of the end of the fiscal year ended March 31, 2016, is as follows:

Total assets were ¥1,033,311 million, a decrease of ¥50,139 million compared to the end of the fiscal year ended March 31, 2015. Current assets were ¥483,855 million, a decrease of ¥60,765 million compared to the end of the fiscal year ended March 31, 2015. This was mainly attributable to decreases in trade receivables and inventories of ¥42,266 million and ¥19,522 million, respectively. Non-current assets were ¥549,456 million, an increase of ¥10,626 million compared to the end of the fiscal year ended March 31, 2015. This was mainly attributable to an increase in investments accounted for using the equity method of ¥11,545 million due to Hitachi Tool Engineering, Ltd. (currently named Mitsubishi Hitachi Tool Engineering, Ltd.) being excluded from the scope of consolidation and being accounted for using the equity method.

Total liabilities were ¥528,636 million, a decrease of ¥78,638 million compared to the end of the fiscal year ended March 31, 2015. This was mainly attributable to decreases in trade payables, long-term debt, and liabilities related to assets held for trading of ¥29,615 million, ¥26,082 million, and ¥10,264 million, respectively. Total equity was ¥504,675 million, an increase of ¥28,499 million compared to the end of the fiscal year ended March 31, 2015. This was mainly attributable to an increase in retained earnings of ¥58,285 million.

2) Cash flows

Cash and cash equivalents as of the end of the fiscal year ended March 31, 2016, were ¥120,300 million, an increase of ¥41,271 million from the end of the fiscal year ended March 31, 2015, as a result of cash used in investing activities and financing activities exceeding net cash provided by operating activities.

The analysis of cash flows for each category as of the end of the fiscal year ended March 31, 2016, is as follows:

<Cash Flows from Operating Activities>

Net cash provided by operating activities was ¥115,742 million, which was mainly attributable to net income of ¥68,980 million and depreciation and amortization of intangible assets of ¥42,927 million for the fiscal year ended March 31, 2016.

<Cash Flows from Investing Activities>

Net cash used in investing activities was ¥32,147 million, consisting of mainly the following factors: proceeds of ¥31,191 million from sale of investments in securities and other financial assets by transferring shares equivalent to 51% of the issued shares in Hitachi Tool Engineering, Ltd. (currently named Mitsubishi Hitachi Tool Engineering, Ltd.) to Mitsubishi Materials Corporation as of April 1, 2015, and payment of ¥53,646 million for the purchase of property, plant and equipment.

<Cash Flows from Financing Activities>

Net cash used in financing activities was ¥37,872 million, which was mainly attributable to repayment of long-term debt of ¥30,034 million and payment of dividends of ¥11,543 million to shareholders.

	3/2014	3/2015	3/2016
Ratio of equity attributable to shareholders of the parent company	43.9	43.0	48.0
Ratio of equity attributable to shareholders of the parent company at market value	74.0	72.8	48.0
Ratio of interest-bearing debts to cash flows	178.7	234.3	190.4
Interest coverage ratio	40.9	38.1	30.6

*Ratio of equity attributable to shareholders of the parent company: Equity attributable to shareholders of the parent company/total assets

Ratio of equity attributable to shareholders of the parent company at market value: Total market value of stocks/total assets

Ratio of interest-bearing debts to cash flows: Interest-bearing debts/cash flows from operations

Interest coverage ratio: Cash flows from operations/interest paid

- Each indicator is calculated using financial information per consolidated financial statements.
- Total market value of stocks is calculated by multiplying the closing stock price at the fiscal year end by total number of stocks issued (excluding treasury stocks) as of the fiscal year end.
- Cash flows from operating activities in the consolidated statements of cash flows are used as cash flows from operations in the above calculation. Interest-bearing debts include all interest-bearing debts recorded in the consolidated statement of financial position. Interest paid represents the amount of interest expenses paid per the consolidated statements of cash flows.
- As the Company has applied IFRS from the fiscal year ended March 31, 2015, with the transition date to IFRS of April 1, 2013, indicators for the fiscal years ended on or before March 31, 2013, are not disclosed.

(3) Dividend Policy and Dividends for the Current and Next Fiscal Years

The Company's basic dividend policy is to determine profit distributions to shareholders and internal reserves by comprehensively assessing business environment, business development, and business performance. Management's primary commitment is to generate robust growth over medium-term to long-term period, by strengthening the international competitiveness and enhancing the corporate value of the Company, to deliver appropriate returns of profits to shareholders in a long-term period under the business environment with evolving customer needs and technology and globalization. The internal reserves are to be used for development and commercialization of new materials, incubation of new businesses, and expansion and streamline of competitive product lines by looking into the future business development. The Company purchases treasury stock to implement the agile capital policy in accordance with its needs, financial conditions, stock price levels, and other factors.

For dividend payments from the current fiscal year's retained earnings, the management paid an interim dividend of ¥13 per share (the dividend record date: the end of the second quarter) and forecasts a year-end dividend of ¥13 per share (the dividend record date: the end of the fiscal year), which will result in an annual dividend of ¥26 per share.

For dividend payments from the next fiscal year's retained earnings, the management forecasts an interim dividend of ¥13 per share (the dividend record date: the end of the second quarter) and a year-end dividend of ¥13 per share (the dividend record date: the end of the fiscal year), which will result in an annual dividend of ¥26 per share, considering operating forecasts.

(4) Business Risks

The following are some of the business risks that may affect the performance and financial condition of the Group:

- a) Market trends in electronics, automobiles, construction, and other related industries in which the Group operates
- b) Economic fluctuations in the United States, Asia, Europe, and other regions where the Group sells its products
- c) Price changes in raw materials affected by international market conditions
- d) Effects of fluctuations in interest rates and credit risks associated with financing activities
- e) Impacts of changes in foreign exchange rates on transactions, assets, and debt denominated in foreign currencies
- f) Impairment losses arising from changes in fair value of investment securities held
- g) Disturbances due to economic, social, or political factors affecting overseas operations
- h) Decline in competitiveness and abilities to develop and commercialize new technologies or products
- i) Disputes over intellectual property rights
- j) Increase in costs associated with environmental, export control, or other regulation, or penalties for regulatory violations
- k) Costs related to product defects
- l) Impact of earthquakes or other major natural disasters on business activities
- m) Claims and lawsuits for damages due to unauthorized disclosure of personal and confidential information

The Group strives to avoid or minimize the impact of such risks by establishing and maintaining effective risk management systems. However, these risks may not be fully avoided or minimized, and may affect operating results, financial condition, and other aspects of the Group.

(5) Notes to the Consolidated Financial Statements

[Segment Information]

The Group's operating segments are components for which independent financial information is available and which are regularly reviewed by the Board of Directors to assist the Board in making decisions about resources to be allocated to the segments and to assess performance.

The Group has adopted a Company-based organization structure and established seven business headquarters based on the type of products and services and one major group company. Each of the eight business units prepares a comprehensive strategy and engages in business activities related to their products and services for both the domestic and overseas markets.

The Company transferred shares equivalent to 51% of the issued shares in Hitachi Tool Engineering, Ltd. (currently, named Mitsubishi Hitachi Tool Engineering, Ltd.) to Mitsubishi Materials Corporation. As a result, the Company excluded it from the scope of consolidation as of April 1, 2015, and accounted for using the equity method for the fiscal year ended March 31, 2016.

Based on the above, the High-Grade Metal Products and Materials segment comprises the Specialty Steel Business, Roll Business, and Soft Magnetic Materials Business. The Magnetic Materials and Applications segment comprises the NEOMAX Business and Information System Components Business. The High-Grade Functional Components and Equipment segment comprises the Automotive Components Business and Piping Components Business. The Wire, Cables, and Related Products segment comprises the Electric Wires and Cables Business.

The primary products and services included in each segment are as follows:

Reportable Segment	Major Products and Services
High-Grade Metal Products and Materials	<ul style="list-style-type: none"> •YSSTM brand high-grade specialty steel products (molds and tool steel, alloys for electronic products [display-related materials and semiconductor and other package materials], materials for industrial equipment [automobile-, aircraft-, and energy-related materials], and razor and blade materials) •Precision cast components •Rolls for steel mills •Injection molding machine parts •Structural ceramic products •Steel-frame joints for construction •Metglas[®] amorphous metals
Magnetic Materials and Applications	<ul style="list-style-type: none"> •Magnets (NEOMAX[®] rare-earth magnets; ferrite magnets; and other magnets and applied products) •Soft magnetic materials (soft ferrite; FINEMET[®] nanocrystalline magnetic material; and Metglas[®] amorphous metals) and applied products •Materials and components for IT devices •Materials and components for medical equipment
High-Grade Functional Components and Equipment	<ul style="list-style-type: none"> •Casting components for automobiles (HNMTM high-grade ductile cast iron products, cast iron products for transportation equipment, and HERCUNITETM heat-resistant exhaust casting components) •SCUBATM aluminum wheels and other aluminum components •Forged components for automobiles •Piping and infrastructure components (GourdTM brand pipe fittings, stainless steel and plastic piping components, water cooling equipment, precision mass flow control devices, and sealed expansion tanks)
Wires, Cables, and Related Products	<ul style="list-style-type: none"> •Electric wires and cables (electric power and industrial systems, electronic and telecommunication materials, electric equipment materials, and industrial rubber products) •Automotive products (electronic components and brake hoses) •Information systems (information networks and wireless systems)

Income by reportable segment is based on operating income. Intersegment revenues are based on prevailing market price.
